Specification Guide

Standard Standard + Jumbo Heavy Duty

Bundle Length	Length of bundle
Bundle Type	Quantity of fibers in brush

Trio Series

Product No: WCB 410

Description: Copper brush with thread-M6 for light applications

Thread Type: M6

Bundle Length: 38mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 415

Description: Copper brush with thread-M6 for light applications

Thread Type: M6

Bundle Length: 38mm

Ferrule Material: Stainless Steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 414

Description: Copper brush with thread-M6 for light applications

Thread Type: M6

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 430

Description: Copper brush with thread-M6 for light applications

Thread Type: Tapered thread

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Trio Series

Product No: WCB 435

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 436

Description: Copper brush with thread-M6 for heavy applications

Thread Type: Tapered thread

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 445

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 446

Description: Copper brush with thread-M6 for heavy applications

Thread Type: Tapered thread

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Spark Series

Product No: WCB 600

Description: Copper brush with thread-M6 for light applications

Thread Type: M6

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 610

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6 thread

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 611

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6

Bundle Length: 45mm

Ferrule Material: Stainless Steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 612

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6 thread

Bundle Length: 45mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Spark Series

Product No: WCB 635

Description: Copper brush with internal thread-M10 for heavy applications

Thread Type: M10 internal

Bundle Length: 70 mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 630

Description: Copper brush with internal thread-M10 for heavy applications

Thread Type: M10 internal

Bundle Length: 70mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Heavy Duty

Standard Standard+ Jumbo

Slimline Series

Product No: WCB 620

Description: Copper brush with thread-M6 for light applications

Thread Type: M6

Bundle Length: 38mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 621

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6 thread

Bundle Length: 38mm

Ferrule Material: Stainless Steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Thunder Series

Product No: WCB 800

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6

Bundle Length: 38mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 825

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6 thread

Bundle Length: 38mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 650

Description: Copper brush with thread-M6 for heavy applications

Thread Type: M6

Bundle Length: 38mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Round Brush Series

Product No: WCB 1518T

Description: Round brush with thread-M6 for cleaning weld inside pipes

Thread Type: M6

Bundle Length: 90mm

Ferrule Material: Stainless steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 1525T

Description: Round brush with thread-M6 for cleaning weld inside pipes

Thread Type: M6 thread

Bundle Length: 90mm

Ferrule Material: Stainless Steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 1540T

Description: Round brush with thread-M6 for cleaning weld inside pipes

Thread Type: M6

Bundle Length: 38mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Propel Torch Series

Product No: WCB 405

Description: Copper brush with straight shaft for light applications

Thread Type: Straight shaft

Bundle Length: 45 mm

Ferrule Material: Copper

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 406

Description: Stainless steel brush with straight shaft for light applications

Thread Type: Straight Shaft

Bundle Length: 45mm

Ferrule Material: Stainless Steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Flow Through Series

Product No: WCB 650

Description: Stainless steel fluid flow through brush with protection sleeve

Thread Type: Internal thread M10

Bundle Length: 45 mm

Ferrule Material: Stainless Steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty

Product No: WCB 655

Description: Stainless steel fluid flow through brush with protection sleeve.

Thread Type: Internal Thread M10

Bundle Length: 65mm

Ferrule Material: Stainless Steel

Compatibility: Electrolyte weld cleaning machine

Bundle Type:

Standard Standard+ Jumbo Heavy Duty
