WHY

JAGUAR BRUSHLINE

Jaguar Brushline is a specialised manufacturer of weld cleaning brushes and offers the largest spectrum of these brushes and accessories to suit every application.

For over a decade, **Jaguar Brushline** has been producing weld cleaning brushes and consumables, supplying the world's famous industries and brands. Over time we have developed different styles for particular needs and applications.

SINCE
2011

01

Always Step Ahead!

Our strongest department is research and development. We have been innovating and developing weld cleaning brushes according to different applications and industry requirements.

02

Our Aim

To provide the best quality weld cleaning brushes at valued pricing.

High Quality Standards

High Production Capacity

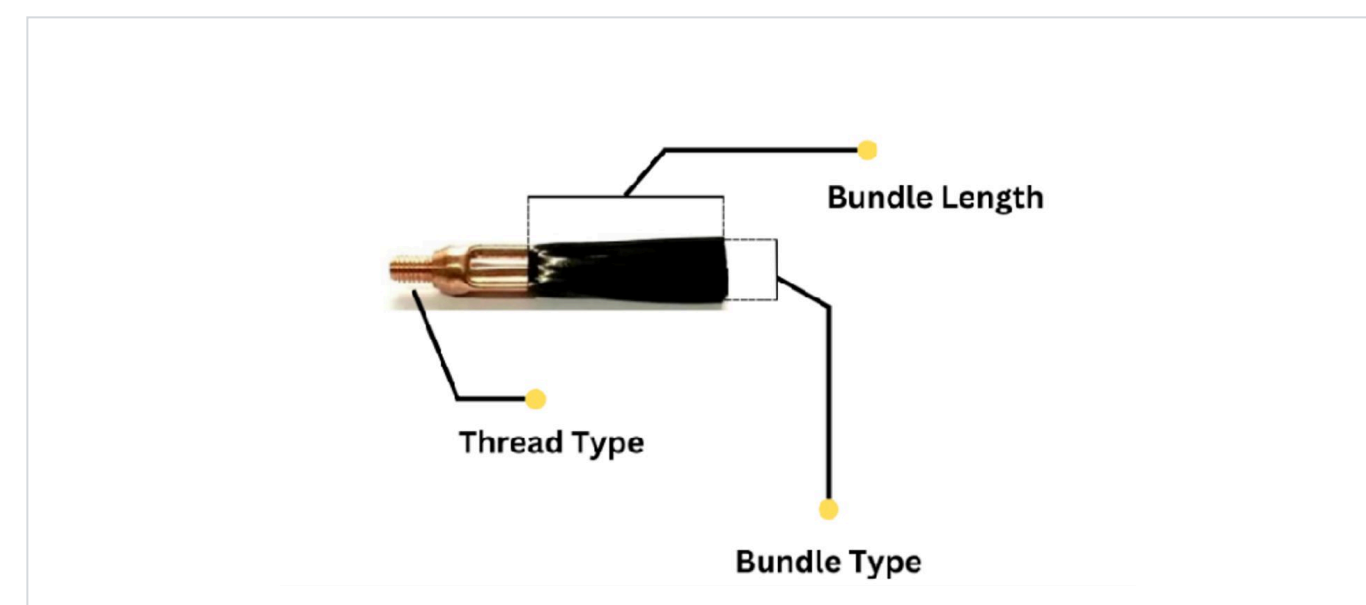

OEM WELD CLEANING BRUSH MANUFACTURER

Designed to your specification. Made by Jaguar Brushline.

Looking for a weld cleaning brush OEM manufacturer?

You are in the right place! We offer the largest spectrum of weld cleaning brushes for cleaning, polishing and passivation on stainless steel, compatible with well-known weld cleaning machines.

CUSTOMISE YOUR BRUSH

INNOVATION AND TECHNOLOGY TOGETHER!

BUILT FOR SCALE AND PRECISION

Our Capabilities and Capacity.

From raw material to final packaging, every stage of the Jaguar Brushline process is built around one goal: **Consistent quality at the volume and speed our partners need.**

Quality

01

Every Weld Cleaning Brush is built from high quality Copper, and Stainless steel and Carbon Fibre which passes a strict quality check at each stage of production. Our highly skilled labour is equipped to handle even the most complex custom designs, so precision and consistency carry through from raw material to finished brush.

Production

02

At Jaguar Brushline, We have capacity to manufacture 200,000 Weld Cleaning Brushes per year. Our production lines are built for high capacity output without compromising on lead times. Lean management systems keep the production floor efficient, letting us scale volume up quickly while keeping turnaround fast for both standard and custom orders.

Express Shipping

03

When timing matters, Jaguar Brushline ships via DHL Express, and urgent orders can go out the same day they are confirmed - so a tight production schedule on your end never has to become a shipping delay on ours.

Packaging

04

Every order is shipped in high quality packing inside branded Jaguar boxes, protecting the brushes in transit. For OEM partners, we also offer three private-label packaging options that ship without any Jaguar Brushline branding, so the product arrives exactly as your customers expect to see it.

OEM WELD CLEANING ACCESSORY MANUFACTURER

Machined to your specification. Made by Jaguar Brushline.

Looking for an OEM manufacturer for weld cleaning accessories?

Wands, handles, adaptors, sleeves - every component is precision machined in-house to your drawing, your tolerances and your branding, ready to ship under your name.

YOUR DESIGN, OUR MANUFACTURING

1

Your Drawing

Share your specification, drawing or sample - dimensions, thread, material.

2

Precision Machining

CNC machined in-house to your exact tolerances and finish.

3

Quality Inspection

Every batch checked against spec before it leaves the factory.

4

Your Branded Part

Packed and shipped under your brand, ready for your customers.

Have a special application? Tell us your requirement, we will manufacture it.

OUR CAPABILITIES

Quality

High quality materials are used

Strong quality check on production

Highly skilled labour for complex designs

Production

High production capacity

Lower lead times

Lean management systems

Express Shipping

DHL Express shipping

Same day shipping for urgent orders

Packaging

High quality packing in Jaguar boxes

Three OEM packaging options without Jaguar Brushline branding

PRECISION WELD CLEANING PARTS AND ACCESSORIES MANUFACTURING

Built to your exact spec.

Every Jaguar Brushline accessory is precision machined in-house on modern CNC equipment — engineered from your drawing to a finished, spec-accurate part.

WCA 02 • 04 • 06 • 08 • 10

MULTI-BRUSH PRODUCTIVITY

One wand, multiple brushes at once.

Jaguar Brushline's Weld Cleaning Adaptors mount multiple brushes to a single WCP wand, so one operator can clean wider seams and more welds in a single pass - WCA 02 through WCA 10, for 2 to 10 brushes at a time.

WELD CLEANING ACCESSORIES
